## St Andrews Links Trust

### Environmental Statement 2006

St Andrews Links Trust is committed to the maintenance and preservation of the historic Links for future generations in a sustainable and environmentally-friendly manner. The Trustees, Links Management Committee and Management endorse the adoption of environmentally-friendly practices throughout the Links. They recognise the importance of such practices not only locally, but nationally and globally. These practices include waste minimisation and recycling, energy efficiency, minimal use of chemicals, water resource management, nature and landscape conservation.

The Trust is committed to:

- a) establishing robust environmental management systems to address a wide range of environmental issues
- b) improving employees' understanding and commitment to environmental practices through structured communications and training in a safe working environment
- c) raising awareness among the golfers, visitors and local community of relevant environmental issues
- d) developing and maintaining constructive relationships with relevant environmental organisations to ensure good communications and sourcing of best advice
- e) introducing sustainable operating procedures and practices to minimise the Trust's overall impact on the environment
- f) a programme of continuous improvement through regular review of environmental policy and practice
