

## **Environmental Policy Statement**

The Montgomerie Papillon Golf Club is committed to leading the industry in minimizing the impact of its activities on the environment. We recognize that respect for the environment goes hand in hand with human well being and sporting excellence.

In golf, harmonious integration with nature and the wise use of our natural resources are the proper goals of all responsible managers

The key points of our strategy to achieve this are:

- Minimize waste by evaluating operations and ensuring they are as efficient as possible.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Protect and enhance our landscape; to maximize the ecological and landscape potential of the site
- Meet or exceed all the environmental legislation that relates to the Company.
- Communicate and educations to ensure that our environmental attitude, policies and practices are accurately perceived by our visitors and the public and to provide appropriate training and information to our employees

It is our goal to achieve continual improvement in environmental performance. We intend to enhance both the ecological value and the recreational enjoyment to be derived from this golf course, to ensure that our commitment to responsible environmental management is recognized in the wider community. We believe golf can serve as a role model for environmental good practices
